

SUMMARY

An SAP Technical consultant and a Canadian PR holder with 12 years of experience across different industry verticals such as Manufacturing, Consumer, IS Retail, IS Oil & Beverages. Executed Development and Data Migration Tracks using Waterfall and Agile methodologies. Worked in 4 end-to-end implementations.

SKILLS

- Technical expertise in ECC6 with diverse modules in SD, MM, WM/RF/Mobile, PP, FI/CO, PS, PM, HR, SCM
- Extensive Development experience in the core areas of ABAP/4, ABAP OOPS:
 - Interactive/ALV Report Reporting
 - Data conversions from the legacy systems to SAP, BDC programming, LSMW, BAPI's
 - Dialog Programming, ABAP OO
 - ALE, IDOC EDI/both inbound and outbound documents
 - Smart forms, SAP Script, ADOBE Forms for Interactive/Non-interactive
 - Enhancements – BADI & User Exits (Screen, menu, function, implicit/Explicit enhancement exits)
 - WM/RF Console Programming using RF Transaction
 - Performance Tuning, Runtime Analysis, SQL Trace and Debugging
 - ABAP on HANA SPS12, S/4, ECC6
 - Attribute, Analytical & Calculation Views in HANA
 - CDS Views
- SAP-ABAP on BW Agile development methodology
- Team Management & Performance Appraisal

WORK HISTORY

SAP ABAP CONSULTANT, TATA CONSULTANCY SERVICES, TORONTO Jun 2018 – Till Date

CLIENT – SIEMENS (OAKVILLE – ON)

MODULE: PP, QM, MM, PS, SD, FI/CO, HR

J2S Project: Engineering Industry

Jun '18 – Mar '19

- *Mass upload & Update Programs: (BAPI / BDC)*
 - Created interactive tools to track, create & change mass data of Parent and Child change numbers using Interactive ALV, and dialog programming - Parent and child package creation for change numbers using BDC
 - DIR uploads - BAPI_DOCUMENT_CHANGE2, BAPI_DOCUMENT_CREATE2
- *Reporting: (ALV / OOPS ALV)*
 - Created Daily sales extract (Finance related SD data from S730 and other related tables) using ALV Oops Container
 - BOM Change Log reporting using Parallel cursor method (SPBT_INITIALIZE, Start new task, on end of task)
 - DMS history log
- **Enhancements: (Enhancements spots/ BADI /User exits)**

- Enhanced CC01/02, XCCA to accommodate Project definitions, vehicle numbers, Equipment numbers and its related data. XCCA function group modification → MC29CFF1_FIELDSELECTION
- Enhanced CO02 - Production order, disabling few custom fields ES_SAPLCOMF→CO_MF_MOD_SPEC
- Enhanced COOIS & COHV Header, Operations & Confirmations view to display BOM, PERNR & Material details using BADI CL_EX_WORKORDER_INFOSYSTEM

▪ **Other Supporting objects:**

- Developed Workflow forward Reporting tool for the Custom Workflow ECM/ECR(CC01/02) Process for order to manage engineering activity – Forward workflow to next available user; Display log
- Pricing routine update for automatic generation of order confirmations for specific changes to existing sales orders.
- Form changes for addition of new fields to custom SAPSCRIPT Banner page for Production Order Banner
- HR Pay result program to pull in Employee's time booking data to automate the pay and time booking front end screens – CAT2/3/5/7/9
- Performance tuning of HR reports
- Enhanced ME23N – Populate terms and conditions in long text (ME_PROCESS_PO_CUST)

Agile Project

Mar '19 – Till Date

▪ **Enhancements: (Epics)**

Addition of Market facing number for Imall Interface to the sales order and its related objects:

- Enhanced Sales order SD screen (Modification) 8459, 4900& 4902 SAPMV45A to add new fields Market facing number, vendor number, Product Number, Product print number in item overview screen and additional data B tab at item level
- Appended VBAP, VBAPKOZ, VBAPKOZX, BAPE_VBAPX structure with new fields (MFN2, Product number & MLFB), flow logic to save data BADI/ MV45AFZZ
- Created customized tool for Rebate Claim process/Bank Search strategy – Screen programming and in turn to update sales order line item details with market facing number MFN2 details along with MLFB (external material number) specific to IMALL interface
- Modified all the objects used in IMALL/Compass interface to append the new fields to VBAP structure using BAPI_SALESORDERCRTFRMDAT2.

Update Sales Order and Production Order user status Dynamically:

- Created interactive ALV to display sales orders that should have the user status changed to blocked and its corresponding components of Production order status as well.
- Then the users will be able to pick and choose the sales order line item wise and update Production order, sales order user status (STATUS_CHANGE_EXTERN) in sequence dynamically along with blocking the components of PO by marking them as withdrawn (MD_RESET_KZEAR_RESB) – Mass update

▪ **Interfaces/Conversions: IDOC & BDC**

Developed customized Tool (ZIOMRESOLVE) to read from IDOC & create Sales order after correcting errors dynamically:

- For Basic Type 'Orders' - IDOC_INPUT_ORDERS FM creates sales order through IDOC coming from third party. Developed customized Function group which reads the IDOC data if failed and re-process the IDOC through BDC session after correcting the errors run as a background job, reducing the manual effort.
- Reads the IDOC data from EDIDC table and converts to BDC data format. The data read is then checked for Invalid Material, Unit mismatch, Minimum quantity, pricing & material mapping error, corrects it and changes/creates the sales order using BDC(VA01) /BAPI_SALESORDER_CHANGE.
- Developed a log report to accumulate the messages and re-process the IDOC after manually correcting the left-out errors through interactive ALV.

▪ **Other Supporting objects:**

- Created pricing routine (VOFM) to allow ZMLC condition type for specific sales office combination with Order type
- Modified Quotation (VA23) and Inbound delivery (VL33N) Smart forms to populate additional line item data, Terms and Conditions dynamically based on Sales org & purchase org resp.
- Created multiple update programs to import presentation server data to application layer (AL11) and display the records with screen programming(se51) and update the data in data dictionary(se11/16).
- Enhanced reports to send emails with attachments in EXCEL & PDF formats

Re-Org 2020 Project

Jun '19 – Aug '19

- Enhanced the program to transfer balances of division or segment profit center changes to manually post balances step by step – staging, approval, simulate posting, post new, Post error, Display log for both Beginning balance/Adjustment balance. (BAPI_ACC_DOCUMENT_POST)
- Update all interfaces with Period POPER selection as well which was done only based on year earlier. (Changes in the depth structure in FY2020)
- Created validations exits (FICO) / substitution rules to check for valid division in the profit center

TEAM LEAD, ACCENTURE SOLUTIONS PVT LTD, BANGALORE, INDIA

Jan 2014 – Jan 2018

S/4 HANA on Premise Implementation Project

May '17 – Jan '18

CLIENT – KIRLOSKAR GROUP, PUNE

MODULES – SD, MM, PP, QM, PS, FI/CO, CRM

- **Led client discussions** for Interfaces and Workflow technical solutioning
- As a team lead, was responsible for estimation of FS, delegating and guiding the team members (Totally 170 ABAP objects)
- Developed complex objects in FI (Complete FI integrated reporting) & Enhancements in PS, PP, QM, MM, SD, FI/CO, CRM
- Developed Reports using **CDS views**

Maintenance & Support Project for UK Client

Feb '14 - Apr '17

CLIENT – HENKEL CONSUMER GOODS

MANAGED SERVICE OWNER (SME / SPOC FOR 3 APPLICATIONS – PP, QM, WM)

- As an MSO, I was accountable for complete end to end business services for PP, QM & WM Applications globally for EMEA, APAC & NA regions, **Escalation SPOC** for any business continuity crisis, SLA/KPI Misses, Project takeover Challenges and Roll-out Hypercare support issues.
- **Managed Escalation calls** for **Live Production system's** issues across global landscapes involving various business stakeholders (3rd parties, Business IT Team, Plant Managers, SME's from Business).
- Conducted weekly review meetings of SLA's with Client Business Head for my applications
- As Enhancement lead, Estimation of RICEF Objects, change requests Deliveries and Maintaining quality checks on REMEDY tool (Ticketing / Change Request Tool).
- Headed MSO 2.0 Initiative Across the project teams for group of 27 MSO's (for various SAP applications across the project of size 400) towards **Process improvements** and implemented 3 new solutions that saved 140 Man-days effort.
- Led a team of 17 to 20 across the span of 3 years. Was responsible and accountable for the Team's and my direct reportees' professional development and performance appraisal

MODULE LEAD, MINDTREE LTD, BANGALORE, INDIA

Aug 2011 – Jan 2014

Maintenance Project for UK Client – Onsite

Sep '12 - Jan '14

CLIENT – TATA GLOBAL BEVERAGES

MODULES – PP, QM, MM, SD

Role – Senior Consultant

- Developed complex Forecast reports for Production Planning using **ALV & Classical reporting and performance tuned** old reports.
- Developed customized screens for Tea blending Production and quality check activity using **Module Pool programming**.
- Conduct weekly L2 meetings with UK business and handle **Incident Management**.

Implementation Project for Middle East Client – Onsite

Jan '12 - Aug '12

CLIENT – AL-GHANIM (CONSUMER SERVICE INDUSTRY)

MODULES – PP, QM, MM, SD, FI, CRM, IS-RETAIL

Role – Senior Consultant & Data Migration Expert

- **Data Migration (BDC/BAPI)**- Material Master Creation and Change (MM01 & MM02 – With extension of Plant and Storage Location), Service Order Creation, JV upload (General Ledger – F.02), IW32, BP (CRM – Business Partner upload) etc.
- **Enhancements (Exits & BADI's)** - BP Tcode (Business Partner Screen Exits), Functional Location Equipment Assignment using BADI, Service order exits, Exits while Delivery creation and save to check stock quantity and to throw appropriate error message.
- **Forms:** Developed Purchase Order Print, Delivery Print, Credit/Debit Memo using *Smartforms*.
- Was involved in techno-Functional Testing, UAT, Regression Testing, Data Migration etc. until Go-live and provided **Hypercare support** for 4 weeks post Go-Live.

Implementation Pilot Project

Sep '11 - Dec '11

CLIENT – UNILEVER (CONSUMER GOODS & HEALTHCARE INDUSTRY)

MODULES – IS-RETAIL

Role – Associate Consultant & Data Migration POC

- Developed *data conversion upload reports* using *BAPI* for Customer Master creation (XD01), Salesman Master creation (PA30), Contract (VA42), Service Master Change (AC02), Initial stock creation (MB1C) and custom Update reports for Primary & Secondary sales for distributors to view weekly progress reports.
- Enhanced Customer master Screen XD01 with custom tabs & custom fields using BADI, Enhanced Salesman Master (SAP-HR) PA30 screen to add Retail Salesman detail using PM30 Infotype maintenance.
- Created *Implicit Enhancements* to check stock quantity for hard & soft materials while delivery creation (VL01N/VL02N) and for Storage Location Determination while doing PGI & Billing (VF01).
- Involved in different testing phases until UAT.

APPLICATION DEVELOPER, IBM INDIA PVT LTD, BANGALORE, INDIA Jan,2007 – Aug 2011

Maintenance Project for UK Client

Jan '09 - Aug '11

CLIENT - SHELL (ENERGY & UTILITIES INDUSTRY (OIL AND GAS DOWNSTREAM))

MODULES – ALL

Role –Software Engineer / Application Developer

- Extensively debugged of RICEFW objects including standard programs, IDOCs, BSP & BW related issues and Implemented OSS notes. Performance tuned Data Extraction BW reports (RSA1) using ST05, SAT etc. and SPOC for ABAP related BW issues
- Solved complex bugs in interface related enhancements for Material Management. The IDOC had exits implemented in sequential processing of Material Document generation in which few parameters were nulled.
- Quality review, Technical specifications, test scripts
- Have been responsible for Performance monitoring of Production systems across landscapes and prepare monthly KPI's as well.

Implementation Project for US Client

Mar '07 - Dec '08

CLIENT – HITACHI METALS (MANUFACTURING (AUTOMOTIVE) INDUSTRY)

MODULES – ALL

Role – Associate software Engineer / Application Developer

- Developed Invoice Memo & Credit/Debit Memo using SAP SCRIPTS
- Developed Scheduling agreement and Purchase order using Smartforms
- Developed Interactive reports for purchasing data.

PROFESSIONAL ACHIEVEMENTS **REDUCTION OF PERSON-DAYS EFFORT**

Performance tuning to reduce execution time of Mass upload reports & BW extraction reports

SME ACTIVITIES IN ACCENTURE

Have conducted multiple training sessions for new joiners in ABAP & OOPS-ABAP

Have been involved in ABAP material design for new joiners across Accenture-India.

APPRECIATIONS & RECOGNITIONS

Recognized and received appreciations for delivering complex and critical objects smoothly – Siemens, Oakville-ON.

Won ACE award among PRODUCTS Industry group for resolving long pending complex issues and handling responsibilities outside the given role

Won THANKS award in IBM (Project – SHELL)

EDUCATION **BACHELOR OF ENGINEERING, ANNA UNIVERSITY, INDIA, 2005**

Electronics & Communication – 72%
