

Raghav Dharani

Senior AI Technical Product Manager | AI-Enabled Platforms, Technical Product Delivery, B2B SaaS

New York, NY | 929-260-8138 | raghav.dr@gmail.com | linkedin.com/in/raghavdharani

PROFESSIONAL SUMMARY

Senior product leader with 10+ years building enterprise SaaS and AI-enabled workflow platforms across retail operations, merchandising, compliance-adjacent store operations, claims automation, and intelligent automation. Experienced turning dense operational and technical requirements into clear product strategy, PRDs, developer-ready stories, prototypes, and measurable product outcomes.

Hands-on technical product manager who partners closely with engineering, design, data science, business leaders, enterprise buyers, and end users. Uses AI-assisted product workflows with Claude and Cursor to create prototypes for live stakeholder validation, sharpen scope, reduce ambiguity, and accelerate design-to-build handoff while keeping delivery artifacts thorough and current.

CORE STRENGTHS

AI Product Management | Technical Product Management | B2B SaaS | PRDs and Developer Tickets | Live Stakeholder Prototyping | Behavioral Workflow Design | Workflow Simplification | Customer Discovery | Roadmap Strategy | API-Driven Platforms | Compliance-Adjacent Operations | Enterprise UX

PROFESSIONAL EXPERIENCE

KWI | Senior Product Manager, Enterprise Merchandising Platform | 2025 - Present

- Took a Transfers Operations application from problem discovery through launch, driving requirements, workflow design, prototype validation, and phased rollout that achieved 70% client migration from legacy workflows within 2 months and reduced transfer errors and exceptions by 30%.
- Introduced AI-assisted, spec-driven development using Claude and Cursor, building working prototypes for live stakeholder validation before engineering engagement and reducing requirement clarification cycles by approximately 25% and rework by 20% to 30%.
- Lead modernization of the core merchandising platform, defining a three-phase roadmap across purchasing and store-transfer capabilities while balancing enterprise customer constraints, technical dependencies, and delivery realities.
- Partner directly with engineering, design, and business leadership to translate ambiguous operational needs into functional specifications, decision frameworks, and implementation-ready stories across a high-complexity retail platform.
- Create structure around legacy workflows by simplifying transfer, purchasing, and merchandising processes into clearer user experiences and delivery artifacts for cross-functional execution.

Upshop | Senior Product Manager, Store Operations Platform | 2022 - 2025

- Built a mobile-first B2B store operations platform from concept through launch across 100+ grocery retail locations, designing for enterprise retail buyers while ensuring frontline users could adopt the workflow in daily operations.
- Launched a grocery ordering and replenishment system powered by ML-based demand signals, giving store teams data-driven production and stocking recommendations that reduced overproduction by 18% and improved forecast accuracy.
- Designed product workflows to influence frontline behavior and drive action completion, increasing user engagement by 40% by replacing fragmented, paper-based store processes with a unified mobile-native experience.
- Introduced compliance-adjacent waste audit and loss prevention workflows from scratch, reducing inventory shrink by 12% across retail networks within 6 months of launch.
- Designed and launched external REST APIs that enabled enterprise clients to connect POS, ERP, and supply-chain systems, expanding the platform's role within broader enterprise technology ecosystems.
- Led product discovery and solution design directly with enterprise customers and store-level end users, using first-hand workflow insight to drive roadmap decisions that exceeded deployment performance targets by 30%+.

360insights | Lead Product Manager, Channel Incentive and Claims Platform | 2019 - 2022

- Owned roadmap and execution for an enterprise SaaS platform serving 100+ clients across channel operations, claims workflows, and data management in a complex multi-stakeholder environment.
- Led a ground-up rebuild of the claims platform that doubled processing throughput and cut manual review effort by 50% through workflow architecture improvements and process redesign.
- Built data ingestion and API-driven onboarding workflows that reduced enterprise client implementation timelines by 35% and improved customer time-to-value.
- Improved client NPS from 6.5 to 8.5 through targeted investments in reporting transparency, workflow visibility, and operational performance tooling.

- Influenced senior stakeholders on roadmap and system design decisions in a financially driven, compliance-sensitive environment through structured product narratives and clear tradeoff framing.

EdgeVerve Systems | Product Manager, AI and Intelligent Automation Platform | 2016 - 2019

- Led product development for an enterprise AI/ML-driven automation platform from ideation through market launch, partnering with engineering and data science to bring a technically complex product to enterprise customers.
- Drove a 50% increase in platform adoption by defining routing, exception handling, monitoring, AI classification, and decision logic capabilities for production workflows aligned to enterprise SLAs.
- Contributed to Forrester Wave Strong Performer recognition in the 2017 RPA category by shaping product narratives that translated early AI complexity into clear business value for enterprise buyers.

AI PROTOTYPING AND TECHNICAL PRACTICE

- Builds working product prototypes and workflow specs in Claude and Cursor before engineering involvement, using them in live stakeholder validation to test scope, reduce ambiguity, and accelerate design-to-build handoff.
- Applies AI-assisted product workflows to draft specs, organize complex workflow information, identify requirement gaps, and prepare development-ready product artifacts.
- Works across REST API design, event-driven workflow patterns, technical requirements, architecture tradeoffs, and integration-heavy enterprise platforms.

EDUCATION AND CERTIFICATIONS

MBA, Management Development Institute

B.E., R.V. College of Engineering

CSPO, Certified Scrum Product Owner, Scrum Alliance

Pragmatic Marketing, Level II Certified
