

Raghav Dharani

Senior Product Manager — AI Platforms, B2B SaaS, Data-Driven Product Strategy

New York, NY | 929-260-8138 | raghav.dr@gmail.com | linkedin.com/in/raghavdharani

PROFESSIONAL SUMMARY

Product leader with 10+ years building and scaling enterprise SaaS platforms across AI-enabled systems, operational decision platforms, and data-intensive B2B products in retail, financial services, and automation. Experienced in owning multi-quarter product strategy end-to-end — from market analysis and customer discovery through cross-functional execution and measurable outcomes. Track record of shipping ML-powered products, driving platform adoption, and translating complex technical capabilities into clear business value for enterprise buyers.

Comfortable navigating ambiguity across engineering, data science, design, sales, and executive stakeholders. Brings a quantitative, experimentation-oriented approach to product decisions and a hands-on practice of AI-assisted prototyping to compress discovery and de-risk delivery.

CORE STRENGTHS

Multi-Quarter Product Strategy · AI/ML-Enabled Platforms · B2B SaaS Product Leadership · Data-Driven Decision-Making · Cross-Functional Alignment · Experimentation & Metrics Ownership · Executive Communication · API-First Architecture · Market & Competitive Analysis · PM Mentorship

PROFESSIONAL EXPERIENCE

KWI

Senior Product Manager — Enterprise Merchandising Platform | 2025 – Present

- Own product direction and multi-quarter roadmap for a core merchandising platform, defining a three-phase modernization strategy across purchasing and store-transfer capabilities while balancing enterprise customer constraints and delivery realities.
- Took a Transfers Operations application from problem discovery through launch — drove requirements, workflow design, and prototype validation through phased rollout, achieving 70% client migration within 2 months and reducing transfer error rates by 30%.
- Introduced AI-assisted, spec-driven development using Claude and Cursor — building working prototypes before engineering engagement, reducing requirement ambiguity by ~25% and rework by 20–30%; now adopted as standard practice across the product team.
- Partner directly with engineering, design, and business leadership as the single point of product accountability, translating ambiguous operational needs into clear functional specs, decision frameworks, and implementation-ready stories.

Upshop

Senior Product Manager — Store Operations Platform | 2022 – 2025

- Built a mobile-first B2B SaaS store operations platform from the ground up — greenfield product taken from concept through launch across 100+ grocery retail locations, managing the full product lifecycle end-to-end.
- Launched an ML-powered ordering and replenishment system driven by predictive demand signals, reducing overproduction by 18% and improving forecast accuracy — translating data science capabilities into actionable frontline decisions.
- Drove 40% increase in user engagement by replacing fragmented processes with a unified mobile experience, using adoption metrics and behavioral data to iterate on product design and drive measurable outcomes.
- Designed and launched external REST APIs enabling enterprise clients to connect POS, ERP, and supply-chain systems, expanding the platform's role within broader technology ecosystems and supporting marketplace-like integration patterns.
- Led solution design and product discovery directly with enterprise customers and end users; used that signal to drive roadmap decisions that exceeded performance targets by 30%+ across deployments.

360insights

Lead Product Manager — Channel Incentive & Claims Platform | 2019 – 2022

- Owned roadmap and execution for an enterprise SaaS platform serving 100+ clients across channel operations, claims workflows, and data management — setting targets, measuring results, and driving continuous improvement in a multi-stakeholder environment.

- Led a ground-up rebuild of the claims platform that doubled processing throughput and cut manual review effort by 50%, delivered through improved workflow architecture and data-driven process redesign.
- Built new data ingestion and API-driven onboarding workflows that reduced enterprise client implementation timelines by 35%, directly impacting revenue velocity and customer time-to-value.
- Improved client NPS from 6.5 to 8.5 through targeted investments in reporting transparency, workflow visibility, and operational performance tooling — using quantitative feedback loops to prioritize high-impact improvements.
- Influenced senior stakeholders on roadmap and system design decisions through structured product narratives, clear tradeoff framing, and executive-level communication in a financially driven, compliance-sensitive environment.

EdgeVerve Systems

Product Manager — AI & Intelligent Automation Platform | 2016 – 2019

- Led product development for an enterprise AI/ML-driven automation platform from ideation through market launch, partnering with engineering and data science to define ML classification, NLP, and decision logic capabilities for production workflows.
 - Drove 50% increase in platform adoption by defining routing, exception handling, and monitoring capabilities; embedded AI-driven decision logic into workflows aligned to enterprise SLAs.
 - Contributed to Forrester Wave Strong Performer recognition (2017, RPA category) — built product narratives that translated AI complexity into clear business value for enterprise buyers and shaped competitive positioning.
-

AI PROTOTYPING & TECHNICAL PRACTICE

- Builds working product prototypes and workflow specs in Claude and Cursor before engineering involvement — used actively to validate scope, reduce ambiguity, and accelerate design-to-build handoff. Experiments with AI integration into structured decision workflows, including predictive recommendations and orchestration logic within operational systems.
-

EDUCATION & CERTIFICATIONS

MBA — Management Development Institute **B.E.** — R.V. College of Engineering

CSPO — Certified Scrum Product Owner, Scrum Alliance Pragmatic Marketing — Level II Certified
